

# STAINLESS TRIPLE HOT-COLD SINK

## INSTRUCTIONS

---

### STEP 1

Connect a standard male-end garden hose end to the female end of the hose on the unit. Turn on the water supply (not provided).

### STEP 2

Plug in the power cord from the water pump and hot water tank to a standard 110-volt supply.

### STEP 3

Allow 10-15 minutes for the hot water tank to heat the supplied water before first use.

### STEP 4

Place the drain hose on the ground unrolled to allow proper drainage.

### STEP 5

Use the sink as needed.

### AFTER HOURS:

Contact your local branch.

---

### NOTE

Do not plug in the electrical plug until the water connection is made and supplied. Doing so will result in a failing pump and/or hot water tank.
