

ELECTRIC SPRAYER 12L

INSTRUCTIONS

STEP 1

Plug units electrical power plug into an outlet or grounded extension cord.

STEP 2

Unscrew cap and fill tank with approved disinfectant solution being careful not to spill any on outside of tank or spray gun.

STEP 3

Place the unit on your back.

STEP 4

Ensure the flow knob is turned to "**OFF**". Turn on the machine by turning the knob to the "**ON**" position. To efficiently disinfect your surface, start by spraying from top to bottom.

STEP 5

Let your surface dry. Dry time varies from one to five minutes depending on material and amount distributed.

STEP 6

When finished, turn the knob back to "**OFF**". Be sure to flush out tank and line with clean water.
